How to Light the Pilot Light on the Optima Deepfryer

Pilot

Pilot Dial

1. Turn dial to down position.
2. Press and Hold for 5 minutes (This is how long it takes for the propane to reach the pilot).
3. Light pilot light with barbecue lighter.
4. When there is a steady flame keep pressing for 45 seconds to heat up the thermocouple, then turn pilot light to the on position (to the right) and set heat temperature.
